Visual Stimulation

Inclusive Play

Nature Play

Description

The Bug Eyes Hornet play panel features 100mm diameter shatter-proof polycarbonate dome bug eye windows. Available with red, yellow, blue or green eyes as well as a mirrored version. Children can have fun imagining they are looking through the eyes of bugs from one side, while from the other side it looks like the bugs are coming out of the panel at you. All AMV Play Panels can be wall mounted or mounted onto posts fixed into the ground. Multiple panels can be installed side by side or back to back. Please ask for further details of the options available.
