Nature Play

Description

The Fireball Play Panel has 2 easy to spin rotating drums that contain balls that create a sound when the drum is rotated. This is an interactive and fun play panel that is great for any playground. The main panel is made from HDPE and the clear window in the daisy head is made from polycarbonate, which is virtually unbreakable and will keep the balls contained and safely away from the children. All AMV Play Panels can be wall mounted or mounted onto posts fixed into the ground. Multiple panels can be installed side by side or back to back. Please ask for further details of the options available.
