Stimulation

Inclusive Play

Phonics & Spelling

Description

The Phonics Tree panel has been designed by finding out what teachers want from a phonics panel. The panel has been designed to incorporate sliding phonics discs, so there are no loose parts to go missing or to fly around the playground or to have to be put away each night. This panel also has a built in chalkboard so the children can write down the words that they can find as they go along. This panel can be specified with your own set of phonics letters and panel letters so you can make the panel as easy or as difficult as you like. Bespoke design options are also available. All AMV Play Panels can be wall mounted or mounted onto posts fixed into the ground. Multiple panels can be installed side by side or back to back. Please ask for further details of the options available.
