Depth	68 mm

Key Stage:

Play Values

This product supports the following areas of child development.

Fine Motor Skills

Competitive Play

Tactile
Stimulation

Inclusive Play

Problem Solving

Games & Puzzles

Description

The Pinball Play Panel was designed around a purpose made stainless firing pin that has a nice easy spring loaded action and is totally safe for children to use without danger of entrapment. The panel also features a new sliding total score mechanism that is more compact and easier to handle. The Pinball Play Panel is a fun and challenging game to play. The choice of materials used to manufacture each of the panels will vary from design to design, however the quality of the materials will always remain very high. All exposed fasteners are made from stainless steel, as are all rods, tubes and ball bearings. All clear window and mirror inserts are manufactured from polycarbonate, which is virtually unbreakable and will keep the cogs, bearings and small parts safely away from the children. All small parts including discs, counters, frames and bolt covers are made from HDPE, the same as the main panel. Bespoke design options are also available. All AMV Play Panels can be wall mounted or mounted onto posts fixed into the ground. Multiple panels can be installed side by side or back to back. Please ask for further details of the options available.
