This product supports the following areas of child development.

Fine Motor Skills

Tactile Stimulation

Inclusive Play

Understanding the World

Nature Play

Description

The next generation of Today's Weather is... panel features 6x sliding weather forecast discs with printed design inserts, 4x temperature sliding discs and a spinning windmill disc pointer to show how windy it is. Because the sliding discs move in an easy-glide channel there are no loose pieces to worry about going missing or to put away and get out again each day. This panel can be used to show the weather forecast for the day or to record the current weather conditions. Bespoke design options are also available. All AMV Play Panels can be wall mounted or mounted onto posts fixed into the ground. Multiple panels can be installed side by side or back to back. Please ask for further details of the options available.
