This product supports the following areas of child development.

Climbing

Co-Operative Play

Description

Our Madera line consists of unique playground equipment made of stainless steel with a natural look.

Due to the low height of the Madera Slide, smaller children can also get on this slide (with the help of parents or escorts) and slide down again. The older children can climb the slide by themselves to roam down. At the same time, the curved poles, with a special, strong light-brown coating, stimulate the imagination of children playing, because a curve like that could be anything. Play elements of the Madera Slide: slide and ladder.

BENEFITS

- Play equipment with a natural look for natural playgrounds.
- Transparent play equipment, keeping sight lines open.
- TÜV certified.
