Gross Motor Skills

Description

Our Madera line consists of unique playground equipment made of stainless steel with a natural look.

Several children can swing at the same time on the Madera Double swing antiwrap with two regular seats. The special anti-wrap bearings prevent the seats from winding up, making it safer for children to swing. At the same time, the curved poles, with the special, strong light-brown coating, stimulate the imagination of children playing, because a curve like that could be anything.

This swing is configurable. It can be expanded to up to 5 portals (15 meters wide). In addition, there is a choice of different materials for uprights, different seats and options for standard bearings or anti-wrap bearings with an anti-twist system.

BENEFITS

- Play equipment with a natural look for natural playgrounds.
- Transparent play equipment, keeping sight lines open.
- Different seats on request
- TÜV certified.
