Dimensions:

Length	150 mm
Width	2850 mm
Height	800 mm

Key Stage:

KS 2

Description

When children engage in physical activity, their senses are engaged, growing awareness, and understanding. The trim-trails create an agility course that can be tailored to suit the age group, flooding the senses with a range of skills including balance, strength, climbing, stretching and co-ordination. They encourage inclusion and problem solving and are a good way to encourage exercise for those children who struggle to engage in team sports.

The sustainably sourced timber has been dried to reduce surface cracks and pressure treated with the leading wood preservative to give advanced protection against the threat of wood decay and insect attack. The chamfered, high quality, sanded timber equipment will provide use for many years to come.

All AMV Timber Activity & Fitness Trail equipment is made from sustainably sourced timber and available in two grades of high-quality timber with respective warranties of 10 or 15 years.

Steel feet available as optional extra

MATERIAL FINISH

Sanded and Splinter Free Pressure Treated with TANALISED E 8000 wood preservative

SAFETY SURFACING

No safety surface is required if used correctly as the critical fall height is less than 600mm. However we suggest installing surfacing if the equipment will be used without supervision.

WARRANTY**10 year timber warranty**

- Standard pine option (10 year in-ground guarantee)
- Sustainably sourced FSC certified softwood

15 year radiata warranty

- Radiata pine option (15 year in-ground guarantee)
