Height	2100 mm

Key Stage:

Play Values

This product supports the following areas of child development.

Stretching & Flexibility

Strength

Hanging

Hand-eye Co-ordination

Gross Motor Skills

Climbing

Description

"Traversing" means to climb across rather than to climb up. This activity requires skill, strength and agility. The traverse walls have handholds and footholds which allow children to move along the wall. It provides a great way for children to exercise and is popular in the school playground. Traversing aids co-ordination and helps to develop upper body strength. Differing routes offer easy or difficult ways to travel stimulating the child to work out which route to take. Transparent traverse walls are a great way for children to have fun yet remain safe and are never out of sight.
