Dimensions: Key Stage: Length 2995 mm Width 100 mm Height 300 mm

Play Values

This product supports the following areas of child development.

Description

KS 2

Our Steel Balancing Beam is a low-level outdoor activity item which helps improve balance & amp; coordination. It can be installed as a standalone piece of play apparatus or to link to other trim trail items in our range.

Children learn by having fun and, with AMV heavy duty vandal resistant products, you can be sure that they will do so for many years to come. The Trim Trail equipment is bright and colourful, with anti-slip surface and helps to improve balance, agility and co-ordination.

As with all AMV equipment, it is made in steel which dries quickly after the rain and won't split, distort or lose grip. Even better, unlike wood, it needs very little maintenance. Contact the team for our bespoke approach so your own ideas can be turned into a tailor-made trail.
