Co-Operative Play

Description

The River Run water game is a great new product that will give children hours of fun and activity playing with and learning about water and the way it flows in the playground or class room. The river bed is constructed with routed features and layered HDPE contours which mimic a mini Grand Canyon, along with a dam, bridge and gate built in to the structure to complete the play possibilities. The River Run bed is supplied fully assembled and comes complete with recycled plastic posts for installation, it also comes with a freestanding, themed Water Basin to contain the water, which can be installed with ground anchors if required. Toys and water are not included.
