## Dimensions:

Length	3140 mm
Width	2510 mm
Height	1800 mm

## Key Stage:

## Description

Clamber means to climb using both hands and feet in an effortful way, this form of climbing can be physically demanding but it can provide the opportunity to develop balance, strength, and coordination. A stack is typically a pile of objects that are neatly arranged, however a clamber stack is designed to appear disorganised. Using timber and rope the clamber stack simulates a natural, challenging, and enjoyable play environment which can ignite a child's imagination, encourage problem solving and help to build confidence.

All AMV Timber Activity & Fitness Trail equipment is made from sustainably sourced timber and available in two grades of high-quality timber with respective warranties of 10 or 15 years.

Steel feet available as optional extra
