This product supports the following areas of child development.

Gross Motor Skills

Description

The children start walking at the head of the snake and follow the dashed line along its body until one lap has been completed. When eight laps are completed then a mile has been walked. This can be done on separate occasions during the day or at once during a PE lesson. The playground mile walk is designed for schools that do not have extensive school grounds to accommodate a mile track. AMV will individually design a circuit to fit your play area and calculate the number of circuits required to complete one mile.
