

## Tubular Bells (set of 7)

Product Code AMVPP-MI-009

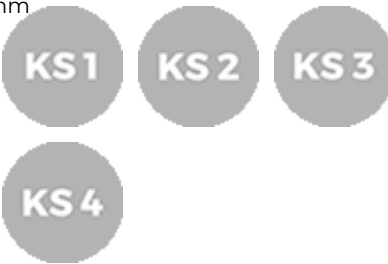

### Price on Application

Price includes FREE delivery to UK mainland (excluding Highlands).

#### Dimensions:

Height 1600 - 2200 mm  
Depth 100 mm

#### Key Stage:

### Play Values

This product supports the following areas of child development.

Fine Motor Skills

Inclusive Play

Auditory  
Stimulation

Musical Play

### Description

These big, bold, beautiful bells have outstanding resonance, the bells produce deep tones which you can feel as well as hear. The set of seven aluminium 'bells' range from 1.6m to 2.2m tall and are all 100mm in diameter and are pentatonically tuned ranging from A3-C5. Built with durable materials, designed to withstand tough environments, the centre post is strengthened and the outer tubes fixed using stainless steel security screws located top and bottom. Each bell is capped to prevent debris from entering the bell and dampening the sound. The set of seven chimes also comes with two metal posts, each with a large beater attached by steel cables. There are a variety of ways that the chimes can be arranged, as the beater posts offer a considerable amount of range. However, we recommend arranging them in a horseshoe shape to create a surround-sound effect and noticeable vibrations for anyone standing in the middle of the shape. Simple yet striking, these bells will bring an architectural feature to your outdoor area as well as an amazing auditory experience.
