

Cherub

Product Code AMVPP-MI-014

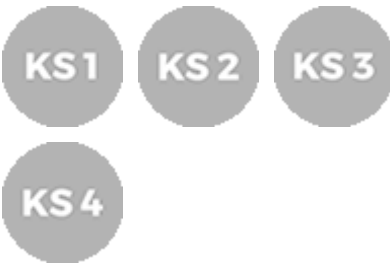

Price on Application

Price includes FREE delivery to UK mainland (excluding Highlands).

Dimensions:

Length	700 mm
Height	1800 mm
Depth	120 mm

Key Stage:

Play Values

This product supports the following areas of child development.

Fine Motor Skills

Inclusive Play

Auditory
Stimulation

Musical Play

Description

The beautiful, elegant and healing sounds of the Cherub make it the perfect addition to sensory gardens in children's centres, special needs environments, hospitals, nursing homes, schools or colleges. The 11 tubular bells are made from hand tuned, heavy duty anodized aluminium and are each mounted individually over impact-resistant dark green ABS plastic resonators which are equally precisely tuned. The Cherub can be wall mounted or affixed to posts for easy installation into any surface. The elegant design is based on the Percussion Play Cadenza xylophone, however each note has a half degree spacing, creating a shape that when mirrored, resembles the wings of an Angel - hence the inspiration for the name. Designed heavy-duty versions are ideal for high use or unsupervised applications, where less durable fixtures and fittings may suffer from wear and tear. Heavy-duty versions have black anodized aluminium resonators instead of the coloured ABS with polyurethane caps on the end of each resonator. The notes are securely mounted onto high density polyethylene backboards. Finally, stainless steel security fixings offer unparalleled durability.
