

Sonora

Product Code AMVPP-MI-015

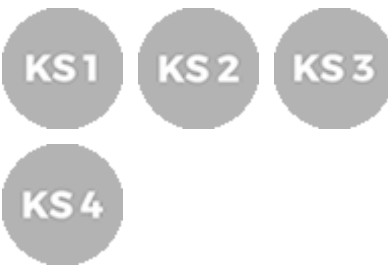

Price on Application

Price includes FREE delivery to UK mainland (excluding Highlands).

Dimensions:

Length	1400 mm
Height	1800 mm
Depth	120 mm

Key Stage:

Play Values

This product supports the following areas of child development.

Fine Motor Skills

Inclusive Play

Auditory
Stimulation

Musical Play

Description

The Sonora's melodious bells chime out loud with a resounding sonorous musical voice! The 21 tubular bells are made from hand tuned, heavy duty anodized aluminium and are each mounted individually over impact-resistant ABS plastic resonators which are equally precisely tuned. Sonora can be wall mounted or affixed to posts for easy installation into any surface. The elegant design is based on the Percussion Play Duo however each note has a half degree spacing away from the centre creating a wave effect with a varying degree of contortion depending on what angle you're looking on from, it certainly stands out in the crowd! Designed heavy-duty versions are ideal for high use or unsupervised applications, where less durable fixtures and fittings may suffer from wear and tear. Heavy-duty versions have black anodized aluminium resonators instead of the coloured ABS with polyurethane caps on the end of each resonator. The notes are securely mounted onto high density poly-ethylene back-boards. Finally, stainless steel security fixings offer unparalleled durability.
