

Duo

Product Code AMVPP-MI-040

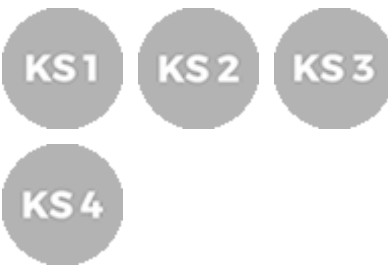

Price on Application

Price includes FREE delivery to UK mainland (excluding Highlands).

Dimensions:

Length	1100 mm
Height	850 mm
Depth	850 mm

Key Stage:

Description

Duo [n pl duos, dui] a. a pair of performers

The Duo is a distinctive instrument with an ergonomic curved design. Accessible from both sides, this instrument can be enjoyed by up to four players. Tuned to the pentatonic scale, the left and right hand side are mirrored and the scale is C-major spanning 2 octaves from C4 to C6.

The notes of the Duo have no wires or strings and are individually and securely attached to the resonators for maximum vibration with incredible tones and resonance. The Duo can be built with individual notes of aluminium, hardwood or GRP. Each of these materials gives a distinct sound when played. The aluminium will produce a bright, clear tone when struck, hardwood produces a strong, deep, resonant sound while GRP is fast and punchy.

Choose the right Duo for you:

Duo Cupla: a clever mix of half aluminium notes and half GRP notes on black resonators.

Duo Jumeau: all aluminium notes on black resonators.

Duo Gemina: all GRP notes on indigo resonators

Duo Kasinda: all hardwood notes on orange resonators

Duo Besso: half aluminium notes and half hardwood notes on black resonators

Duo Kembar: half GRP notes and half hardwood notes on black resonators

The curvaceous design is not just about looking stylish. The wave makes it easier for individuals with limited range of movement, or people with limited reach, to reach all of the notes. It's also perfect for some people living on

the autistic spectrum with many only able to process one sensory system at a time. The Duo was designed to allow two people to interact and make music together without the need to look directly at each other; allowing them to concentrate entirely on the auditory process, comfortably and in their own space.

Playing the Duo is effortless and so friends, siblings, classmates, colleagues or even complete strangers can come together, explore with rhythm and make some great music!

High-Use We have designed heavy-duty versions of several of our instruments; ideal for high use or unsupervised applications, where less durable fixtures and fittings may suffer from wear and tear. Heavy-duty versions have black anodized aluminium resonators instead of the coloured ABS with polyurethane caps on the end of each resonator. The notes are securely mounted onto high density poly-ethylene back-boards. Finally, stainless steel security fixings offer unparalleled durability.

Play Values

This product supports the following areas of child development.

Fine Motor Skills
