

Cadenza

Product Code AMVPP-MI-042

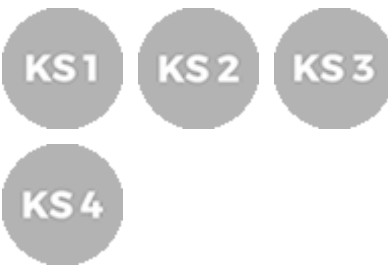

Price on Application

Price includes FREE delivery to UK mainland (excluding Highlands).

Dimensions:

Length	550 mm
Height	850 mm
Depth	565 mm

Key Stage:

Play Values

This product supports the following areas of child development.

Fine Motor Skills

Inclusive Play

Auditory
Stimulation

Musical Play

Description

Strong, weather-proof and durable, the notes of the Cadenza are arranged as a traditional xylophone or glockenspiel with low to high notes going from left to right. The notes or keys are available in three different materials each of which gives its own distinct sound when played: Cadenza Maya: Black resonators with aluminium notes Cadenza Alumba: Indigo blue resonators with GRP notes Cadenza Woden: Orange resonators with hardwood notes. There are no wires or strings as the notes are individually and securely attached to the ABS resonators for maximum vibration with incredible tones and resonance. The instrument is designed for ground or surface installation, but can also be wall mounted. The Cadenza with its lovely curved design is tuned to the C-Major pentatonic scale covering two octaves, perfect for exploring possibilities with melody, harmony, and rhythm. High-Use We have designed heavy-duty versions of several of our instruments; ideal for high use or unsupervised applications, where less durable fixtures and fittings may suffer from wear and tear. Heavy-duty versions have black anodized aluminium resonators instead of the coloured ABS, with polyurethane caps on the end of each resonator. The notes are securely mounted onto high density poly-ethylene back-boards. Finally, stainless steel security fixings offer unparalleled durability.
