Stimulation

Inclusive Play

Understanding
the World

Nature Play

Description

The Scientific Weather Station play panel is the ideal panel for the children to monitor the local weather over a short, medium or long term. The panel has 3 professional, easy to read weather dials and a rain gauge collector, it also has a printed information panel, an A4 sized Results and Observations dry wipe board insert to write down data and sliding discs to record the general weather conditions at that time. While this panel has been designed with safety as the number one priority, it should only be used in a controlled environment, the dials do NOT contain any glass, but they are plastic and not unbreakable, and therefore should be treated like most scientific instruments, with care. All AMV Play Panels can be wall mounted or mounted onto posts fixed into the ground. Multiple panels can be installed side by side or back to back. Please ask for further details of the options available.
