Imaginative Play

Co-Operative Play

Communication Skills

Description

The Fire and Rescue Truck (Fire Engine) is a bright, colourful and fun play unit that will inspire the imaginations of all the children that play in it in the playground. The play fire truck has a slip-resistant floor, dashboard with steering wheel, drivers bench seat so the driver can steer the fire truck and the passenger can give direction to the fire. The fire truck also has 2 steps up to the stainless steel fireman's pole so children can climb up on to the fire truck and join in the fun. The fire truck looks great too with polycarbonate headlight domes and chunky contrasting wheels. Supplied fully assembled with the exception of the stainless steel fireman's pole, this fire and rescue truck requires a minimum of installation time. Each fire and rescue truck is durably built using high quality materials and do not feature any timber, so they will not rot, crack, split or develop splinters, which is very important when children are playing on them.
